

TECHNICAL SKILLS AND INTERESTS

Languages/Technologies: C/C++, Python (Scikit-learn, NumPy, Pandas, TensorFlow, PyTorch, Flask, PySpark, Cassandra), Unix, x86 Assembler, Verilog, Haskell, LEAN, Coq, JavaScript/TypeScript (Angular, Express.js, Node.js), Java, Git, MySQL, Docker, Google Cloud/Firebase, MongoDB, Azure Cloud/Cosmos DB, Oracle Cloud/Autonomous DB, Hadoop, Tableau, LaTeX

Interests: Personal educational projects, solving math/computer science problems

EXPERIENCE

- **Technical Support Specialist** ARNI LLC, June 2026 – July 2026
 - Reinstalling Windows 11, installing printers, configuring employees via Anviz CrossChex, Reminna, AnyDesk, RTSP links, ffmpeg, Python3-Silero VAD
- **Information Security Specialist** ARNI LLC, May 2026 – June 2026
 - Processing audio from cameras, RTSP links, ffmpeg, Python3-Silero VAD
- **Remote Project Worker** Outlier.ai, Beautiful Frontend, April 2025
 - Writing prompts for a custom LLM chatbot for generating Frontend JavaScript and React websites
- **Course Assistant** Discrete Mathematics 2, HSE University (2020)
 - Answering student questions, conducting consultations, grading homework and exams
- **Course Assistant** Algebra, HSE University (2020)
 - Answering student questions, conducting consultations, grading homework and exams

HIGHER EDUCATION

- **MSc in Big Data Management and Analytics:** Griffith College, Dublin (01.2023–06.2024, 77/100 GPA)
- **Applied Mathematics and Computer Science:** HSE University, Moscow (09.2018–06.2022, 7.9/10 GPA)

COURSES AND ACHIEVEMENTS

- **Unium Courses – Game Development, 8th grade (2014) C#**
- **Prizewinner of the “Step into the Future” Math Olympiad, 11th grade (2017–2018)**
- **IELTS, English language, C1, 2022**

PERSONAL PROJECTS

- **Classic Algorithms and Data Structures in C++ (08.2025 – present)**
 - Started a personal repository implementing various classic algorithms and data structures in C++
- **LeetCode Solutions (05.2023 – 07.2023)**
 - C++, Algorithms and Data Structures, solutions with correctness proofs and time complexity analysis
- **Nand2Tetris (07.2023 – 08.2023)**
 - C++, Hack and Jack languages; implementation of Harvard architecture CPU core, translators from stack machine assembler to registers and from registers to binary code, OOP compiler for the Jack language
- **Console Two-Player Chess Application (12.2025)**
 - Rust
- **API Service in Go (11.2025)**
 - Gorm, Goose, httptest/testify, docker-compose
- **Stepik MySQL Problem Solutions (02.2025)**
 - SQL, MySQL
- **Web Platform for Courses on Mathematical Proofs and Programming Problems (03.2023 – 06.2024)**
 - HTML, CSS, Angular, Docker, Node.js, Express.js, Microsoft Azure Cosmos DB, Monaco editor
- **Android AR Interface Application in Java (11.2020 – 06.2021)**
 - Python, Java, OpenCV
- **HDLBits Solutions in Verilog (10.2024 – 11.2024)**
 - Solutions to HDLBits problems, including structural implementations of always blocks
- **Methods for Correct Estimation of the Number of Clusters (03.2022 – 06.2022)**
 - Python, NumPy, Pandas, Scikit-learn, SymPy, SciPy, Matplotlib
- **Galaxy Mass Estimation (03.2020 – 06.2020)**
 - Python, NumPy, Pandas, Seaborn, TensorFlow, Scikit-learn, Matplotlib, XGBoost
- **Mathematical Library in LEAN 4 (05.2024 – present)**
 - LEAN4
